Hi Lydia,

I think we have until tomorrow to get this one done since we have two days from when she makes the changes. I'll sign it as soon as you get the registration notice to me.

Thanks,
Emily

Hi Emily and Lydia,

Thank you very much for your feedback. I have adjusted page 2 in the attached version of the master label. Please let me know if this fulfills your request or if you suggest it needs further modification.

Looking forward to your input.

Thank you,

Milica

Hi Milica,

I looked over your responses and since this is such a long complicated label, I think it's important that you add the statement Lydia has asked you to add on page 2. It is in brackets so not required to be printed on the label so I don't understand why you aren't willing to add it.

Although I think it would be better to have the hand washing statement under precautionary statements section, this product is category IV for everything except eye so I think we can let that one go.

Please make the requested revision to page 2 of the label as soon as possible so we can get this finalized.

Thank you,
Emily

Hi Lydia,

Per our brief conversation this afternoon, attached you will find following information:

- a couple of examples of the base labels for small and larger containers to provide a visual example of what these labels that are adhered directly to the container look like.
- example of printed directions for use label which is physically visible on the container before the base label
- pre-decisional letter + MV comments – further explains reasoning behind my responses to the comments
- copy of the master label

Thank you very much for considering these additional pieces of information before we finalize the label. I look forward to your responses tomorrow on path forward.

Milica

Dear Milica,

Please see the attached pre-decisional letter. CITAB has determined that not including the physical/chemical hazards statement is acceptable.

Best,
